

Data protection policy (compliant with the GDPR)

Introduction

Spectrum is committed to being transparent about how it collects and uses the personal data of its workforce, and to meeting its data protection obligations. This policy sets out the Spectrum's commitment to data protection, and individual rights and obligations in relation to personal data.

This policy applies to the personal data of job applicants, employees, contractors, volunteers, interns, apprentices and former employees, referred to as HR-related personal data. This policy does not apply to the personal data of clients or other personal data processed for business purposes.

Definitions

"Personal data" is any information that relates to a living individual who can be identified from that information. Processing is any use that is made of data, including collecting, storing, amending, disclosing or destroying it.

"Special categories of personal data" means information about an individual's racial or ethnic origin, political opinions, religious or philosophical beliefs, trade union membership, health, sex life or sexual orientation and genetic and biometric data.

"Criminal records data" means information about an individual's criminal convictions and offences, and information relating to criminal allegations and proceedings.

Data protection principles

Spectrum processes HR-related personal data in accordance with the following data protection principles:

- Spectrum processes personal data lawfully, fairly and in a transparent manner.
- Spectrum collects personal data only for specified, explicit and legitimate purposes.
- Spectrum processes personal data only where it is adequate, relevant and limited to what is necessary for the purposes of processing.
- Spectrum keeps accurate personal data and takes all reasonable steps to ensure that inaccurate personal data is rectified or deleted without delay.
- Spectrum keeps personal data only for the period necessary for processing.
- Spectrum adopts appropriate measures to make sure that personal data is secure, and protected against unauthorised or unlawful processing, and accidental loss, destruction or damage.

Spectrum tells individuals the reasons for processing their personal data, how it uses such data and the legal basis for processing in its privacy notices. It will not process personal data of individuals for other reasons. Where Spectrum relies on its legitimate interests as the basis for processing data, it will carry out an assessment to ensure that those interests are not overridden by the rights and freedoms of individuals.

Where the Spectrum processes special categories of personal data or criminal records data to perform obligations or to exercise rights in employment law, this is done in accordance with a policy on special categories of data and criminal records data.

Spectrum will update HR-related personal data promptly if an individual advises that his/her information has changed or is inaccurate.

Personal data gathered during the employment relationship or internship is held in the individual's personnel file in hard copy or electronic format, or both, and on HR systems. The periods for which Spectrum holds HR-related personal data are contained in its privacy notices to individuals.

Spectrum keeps a record of its processing activities in respect of HR-related personal data in accordance with the requirements of the General Data Protection Regulation (GDPR).

Individual rights

As a data subject, individuals have a number of rights in relation to their personal data.

Subject access requests

Individuals have the right to make a subject access request. If an individual makes a subject access request, Spectrum will tell him/her:

- whether or not his/her data is processed and if so why, the categories of personal data concerned and the source of the data if it is not collected from the individual;
- to whom his/her data is or may be disclosed, including to recipients located outside the European Economic Area (EEA) and the safeguards that apply to such transfers;
- for how long his/her personal data is stored (or how that period is decided);
- his/her rights to rectification or erasure of data, or to restrict or object to processing;
- his/her right to complain to the Information Commissioner if he/she thinks Spectrum has failed to comply with his/her data protection rights; and
- whether or not Spectrum carries out automated decision-making and the logic involved in any such decision-making.

Spectrum will also provide the individual with a copy of the personal data undergoing processing. This will normally be in electronic form if the individual has made a request electronically, unless he/she agrees otherwise.

If the individual wants additional copies, Spectrum will charge a fee, which will be based on the administrative cost to the organisation of providing the additional copies.

To make a subject access request, the individual should send the request to HRwebforms@spectrugeo.com or use Spectrum's form for making a subject access request. In some cases, Spectrum may need to ask for proof of identification before the request can be processed and Spectrum will inform the individual if it needs to verify his/her identity and the documents it requires.

Spectrum will normally respond to a request within a period of one month from the date it is received. In some cases, such as where Spectrum processes large amounts of the individual's data, it may respond within three months of the date the request is received. Spectrum will write to the individual within one month of receiving the original request to tell him/her if this is the case.

If a subject access request is manifestly unfounded or excessive, Spectrum is not obliged to comply with it. Alternatively, Spectrum can agree to respond but will charge a fee, which will be based on the administrative cost of responding to the request. A subject access request is likely to be manifestly unfounded or excessive where it repeats a request to which Spectrum has already responded. If an individual submits a request that is unfounded or excessive, Spectrum will notify him/her that this is the case and whether or not it will respond to it.

Other rights

Individuals have a number of other rights in relation to their personal data. They can require Spectrum to:

- rectify inaccurate data;
- stop processing or erase data that is no longer necessary for the purposes of processing;
- stop processing or erase data if the individual's interests override Spectrum's legitimate grounds for processing data (where Spectrum relies on its legitimate interests as a reason for processing data);
- stop processing or erase data if processing is unlawful; and
- stop processing data for a period if data is inaccurate or if there is a dispute about whether or not the individual's interests override Spectrum's legitimate grounds for processing data.

To ask Spectrum to take any of these steps, the individual should send the request to HRwebforms@spectrumgeo.com

Data security

Spectrum takes the security of HR-related personal data seriously. Spectrum has internal policies and controls in place to protect personal data against loss, accidental destruction, misuse or disclosure, and to ensure that data is not accessed, except by employees in the proper performance of their duties.

Where Spectrum engages third parties to process personal data on its behalf, such parties do so on the basis of written instructions, are under a duty of confidentiality and are obliged to implement appropriate technical and organisational measures to ensure the security of data.

International data transfers

HR-related personal data may be transferred to countries outside the EEA, with relation to employees with Line Managers based in one of our international offices,

Individual responsibilities

Individuals are responsible for helping Spectrum keep their personal data up to date. Individuals should let Spectrum know if data provided to Spectrum changes, for example if an individual moves house or changes his/her bank details.

Individuals may have access to the personal data of other individuals [and of our customers and clients] in the course of their employment, contract or internship. Where this is the case, Spectrum relies on individuals to help meet its data protection obligations to staff, customers and clients.

Individuals who have access to personal data are required:

- to access only data that they have authority to access and only for authorised purposes;
- not to disclose data except to individuals (whether inside or outside the organisation) who have appropriate authorisation;
- to keep data secure (for example by complying with rules on access to premises, computer access, including password protection, and secure file storage and destruction);
- not to remove personal data, or devices containing or that can be used to access personal data, from Spectrum's premises without adopting appropriate security measures (such as encryption or password protection) to secure the data and the device;
- not to store personal data on local drives or on personal devices that are used for work purposes; and
- to report data breaches of which they become aware immediately.

Failing to observe these requirements may amount to a disciplinary offence, which will be dealt with under Spectrum's disciplinary procedure. Significant or deliberate breaches of this policy, such as accessing employee or customer data without authorisation or a legitimate reason to do so, may constitute gross misconduct and could lead to dismissal without notice.

Questions about this policy, or requests for further information, should be directed to the Head of Human Resources.
